

*Dr. John Walsh was a towering figure in gastroenterology who had a profound impact in the field of gut-brain peptides in health and diseases.*

A commemorative book  
in his honor entitled:

**Gut-Brain Peptides  
in the New Millennium:  
*A Tribute to John Walsh  
by his Collaborators***

*Edited by Yvette Taché, Yoshiaki Goto,  
Gordon Ohning, and Tadataka Yamada  
Managing Editor, Lori Ennis*

has been prepared for publication.

**T**HIS COMMEMORATIVE BOOK contains a collection of papers by former trainees and collaborators which reflect the wide array of investigations to which Dr. Walsh brought his keen intellectual influence and support. This book will be available for purchase in mid-July.

*See reverse side for details about contents ►*

## INTRODUCTION

- In Memorium—John Walsh: Address to the 13th International Congress on Gastrointestinal Hormones by *Tadataka Yamada*

## GASTRIN, ECL AND D CELLS: REGULATION AND FUNCTION

- To Study the Molecular Nature of Gastrin—and to Know John Walsh: A Flashback to the Seventies by *Jens F. Rehfeld*
- The Gastrins: Their Identities and Functions as Gastric Paracrine Organizers by *Graham J. Dockray*
- Gastrin-Somatostatin Interactions: From Ontogeny to Pathology by *Arthur Shulkes*
- The Role of Amino Acids and Calcium in the Regulation of Human Gastrin Cell Function by *Paul E. Squires and Alison M.J. Buchan*
- Molecular Regulation of ECL Cell Function by *Rod Dimaline*
- Neural Regulation of Gastric Endocrine Cells by *Ningxin Zeng and George Sachs*
- Entero gastric Regulation of Gastric Acid Secretion by *Kevin C. Kent Lloyd*
- Interactions between Gastrin, Gastric Secretion, and *Helicobacter pylori* in Health and Disease by *David Y. Graham and James E. McGuigan*

## GUT PEPTIDES AND THEIR RECEPTORS

- Glutathione: Ubiquitous Peptide with Many Functions by *Neil Kaplowitz*
- Discovery of a New Molecular Form of Cholecystokinin that Demonstrates that the CCKA Receptor Exists in Agonist Selective Affinity State by *Joseph R. Reeve, Jr., Viktor E. Eysselein, Travis E. Solomon, and David A. Keire*
- Motilin by *Pierre Poitras*
- Trefoil Peptides: Regulators of Gastrointestinal Repair and Cancer Progression by *Andrew S. Giraud*
- The Regulation of Gastric Acid Secretion by Pituitary Adenylate Cyclase Activating Polypeptide (PACAP) by *Joseph R. Pisegna*
- VIP-Specific and PACAP-Specific Receptors in Tenia Coli: New Insights into Peptide Signaling and Inhibitory Neurotransmission by *Karnam S. Murthy, Baiqin Teng, Ji-Guang Jin, John R. Grider, and Gabriel M. Makhlof*
- Somatostatin Receptors and the Control of Gastric Acid Secretion by *Vicente Martínez*
- Signaling Mechanisms of the Somatostatin Receptor Subtype SSTR1 by *Chin-Yu Lin and Diane L. Barber*
- Gastrointestinal Peptide Signaling by *Enrique Rozenfurt*
- Gastrin Releasing Peptide-dependent Cyclooxygenase-2 Expression in Fibroblasts by *Lee W. Slice*
- Inhibition of Forskolin and PGE<sub>2</sub>-dependent Increases in cAMP by Galanin Receptor 1 in Transfected Epithelial Cells by *Helen Wong, John H. Walsh, and Lee W. Slice*

## PATHOPHYSIOLOGY OF NERVE-GUT INTERACTIONS

- Brain Medullary Peptides and the Vagal Regulation of Gastric Secretion by *Yvette Taché*
- Hypothyroidism and Autonomic Changes: Role of Medullary TRH by *Hong Yang*
- Peptides in the Enteric Nervous System by *John B. Furness and Daniel P. Poole*
- Mu Opioid Receptor Expression and Endocytosis in Enteric Neurons by *Cattia Sternini and Nicholas Brecha*

- Sensory Neurons in Gastrointestinal Function by *Peter Holzer*
- The Role of the Capsaicin Receptor (VR1) in an Animal Model of Intestinal Inflammation by *Douglas C. McVey and Steven R. Vigna*
- Turning Off the Signal: Mechanisms that Terminate the Biological Responses to Neuropeptides by *Nigel W. Bunnett*
- Sensory Transduction in Visceral Afferents: Role of CCK and Serotonin by *Helen E. Raybould*
- Evidence of Leptin Improving the CCK Responsiveness of Rat Gastric Vagal Afferents Regardless the Change of Circulating CCK Level: An *in vitro* Study by *Jen Yu Wei and Yu Hua Wang*
- Gastrointestinal Hormones, Food Intake and Memory by *John E. Morley*
- Enhanced Efficiency of Nutrient Absorption May Play a Role in Obesity by *Ian L. Taylor and James Croom*
- Pathophysiology of Diabetic Gastroparesis by *Sebastian G. de la Fuente, Toku Takahashi, and Theodore N. Pappas*

## PROCESSES OF GASTROINTESTINAL INJURY AND REPAIR

- Multifactorial Regulation of Paracellular Permeability in Gastric Mucosa by *Andrew H. Soll and Monica C. Chen*
- Duodenal Mucosal Defense Mechanisms by *Jonathan D. Kaunitz and Yasutada Akiba*
- Topography of Cell Proliferation in the Gastric Ulcer Margin of the Rat by *Herbert F. Helander*
- Prospective Therapeutic Application of Cholecystokinin-B/Gastrin Receptor Antagonists for Gastrointestinal Disorders: Prototype Studies by *Yoshiaki Goto, Atsushi Maeda, and Katsuko Yamashita*
- Long-Term Studies of *Helicobacter pylori* Infection in Mongolian Gerbils: Effects of Eradication Timing on Prevention of Malignant Gastric Changes by *Misako Ebata, Yoshihiro Keto, and Susumu Okabe*

## PANCREATIC REGULATION

- The Delta-to-Beta Cell Endocrine Axis Within the Islets of Langerhans by *F. Charles Brunnicardi, Stefan Moldovan, and Michael Norman*
- Expectation of Pancreatic Physiological Responses from CCK<sub>B</sub> Receptor Occupation in its Natural Environment by *Sophie Julien, Jean Lainé, and Jean Morisset*
- Gut Peptide Receptors in Pancreatic Tumors by *Cornelis B.H.W. Lamers, Izäk Biemond, Chengwei Tang, Ruud A. Woutersen, and G. Johan A. Offerhaus*
- Neurohormonal Control of Pancreatic Exocrine Secretion: Role of Muscarinic M1 Receptors by *Manfred V. Singer and Elke Niebergall-Roth*

## CLINICAL RESEARCH

- Gastric Physiology in Human Subjects: The Clinical End of Translational Research by *Gordon Ohning*
- Risk Factors and Recurrence of Ulcer Hemorrhage: Recommendations for Primary and Secondary Prevention by *Thomas O.G. Kovacs and Dennis M. Jensen*
- Clinical Effects of the Proton Pump Inhibitor in Relation to CYP2C19 Polymorphism by *Mohamed Sagar and Rein Seensalu*
- Unravelling the Mystery of Functional GI Disorders by *Emeran Mayer*
